- 4 Advanced Topics

R Package

- Hadley: In R, the fundamental unit of shareable code is the package.
- Hilary Parker: Seriously, it doesn't have to be about sharing your code (although that is an added benefit!). It is about saving yourself time.

R Package from Scratch

see cgr directory

Why devtools?

- This book espouses my philosophy of package development:
- anything that can be automated, should be automated.
- Do as little as possible by hand.
- Do as much as possible with functions.

Overview

Bioconductor

Bioconductor provides tools for the analysis and comprehension of high-throughput genomic data. Bioconductor uses the R statistical programming language, and is open source and open development. It has two releases each year, 934 software packages, and an active user community.

Goals

- To provide widespread access to a broad range of powerful statistical and graphical methods for the analysis of genomic data.
- To facilitate the inclusion of biological metadata in the analysis of genomic data, e.g. literature data from PubMed, annotation data from Entrez genes.
- To provide a common software platform that enables the rapid development and deployment of extensible, scalable, and interoperable software.
- To further scientific understanding by producing high-quality documentation and reproducible research.
- To train researchers on computational and statistical methods for the analysis of genomic data.

see GNB5010-2013/4. Biological Data Analysis and Visualization in R/slides.pdf

ggplot2

```
qplot(mpg, data=mtcars, geom="density", fill=gear, alpha=I(.5), main="Distribution of Gas Milage", xlab="Miles Per Gallon", ylab="Density")
```

ggplot2

```
qplot(hp, mpg, data=mtcars, shape=am, color=am, facets=gear,
size=I(3), xlab="Horsepower", ylab="Miles per Gallon")
```

ggplot2

```
qplot(wt, mpg, data=mtcars, geom=c("point", "smooth"),  
method="lm", formula=y ~ x, color=cyl, main="Regression  
of MPG on Weight", xlab="Weight", ylab="Miles per Gallon")
```

ggplot2

```
qplot(gear, mpg, data=mtcars, geom=c("boxplot", "jitter"),  
fill=gear, main="Mileage by Gear Number", xlab="", ylab="Miles  
per Gallon")
```

ggbio

- ggplot2 + bioconductor = ggbio
- Website: <http://www.tengfei.name/ggbio/>
- Author: Tengfei Yin at Seven Bridges Genomics

ggbio Examples

```
source("http://bioconductor.org/biocLite.R")  
biocLite("ggbio")  
library(ggbio)  
example(autoplot)
```

Next

- 1 R Package
- 2 Bioconductor
- 3 Reproducible Research in R**
 - knitr
 - Interactive Report and Shiny
- 4 Advanced Topics

Overview

- Official website: <http://yihui.name/knitr/>
- Reference: Dynamic Documents with R and knitr
- Author: Yihui Xie

Examples

- the slides of the R lectures are generated by knitr
 - Knitr
 - XeLaTeX
- see knitr directory for the Knitr example in Markdown

Interactive Report

- Google Analytics
- 百度统计 from Baidu.com
- 数据魔方 from Taobao.com

Shiny Overview

- A web application framework for R
- Turn your analyses into interactive web applications
- No HTML, CSS, or JavaScript knowledge required
- <http://shiny.rstudio.com/>

Example

see shinyApp directory
